

# Biochemicals and Reagents for Viral Transport Media Kit

The **Viral Transport Media (VTM) Kit** has gained tremendous importance in recent years for its application in Virology. It is a formulated medium for collection, transport and long term freeze storage of all RNA viruses. It is formulated to maintain the optimum viability and virulence of the viral sample in the medium for clinical research and testing purposes.

The current pandemic of the COVID-19 virus has reimposed faith in millions of scientists to use only the highest quality of the Viral Transport Media Kit. At **SRL**, we develop, synthesize and manufacture various biochemicals and other reagents that are used in the production of the Viral Transport Media Kit. **SRL** is proud to present its acclaimed range of reagents and specialised chemicals for the VTM Manufacturing Industry.
